

Frequency and Reciprocity, Forgotten Portals in Amazonas, Peru **June 17 - July 2, 2007 16 days, \$1990**

Adventure with a spiritual intent. Join us in exploring!

Join in exploring Peru's northern cloud forest, looking for long forgotten energetic sites and re-activating them with our attention and compassion. The indigenous people of this area died from epidemics soon after the Spanish arrived and their temples are now covered with jungle. The ancients knew that the Earth is a living creature, and that their relationship of give and take, or reciprocity, kept a healthy balance. They honored the *Apus*, or mountain spirits, and understood that mountains are earth-beings that act as energetic transformers.

For several centuries, the land has been exploited for human benefit without regard to the *Apus*. On this trip we explore with the intent of pouring our love into these forgotten places, re-establishing a relationship of reciprocity. These awakened frequency centers will assist in balancing our planet and ourselves in approaching times. We'll also explore the concept of reciprocity and health within systems such as cultures, communities, relationships, and our bodies.

We'll be hiking, and perhaps riding mules into the mountains. The terrain may be very steep and thick with jungle. We will be seeking places where even our excellent guide Carlos has not gone!

Essential for this trip: Love of Life and the Earth! Physical fitness, willingness to explore your limits, generosity of spirit, an understanding that we are energetic beings, a sense of adventure!
